Rita,

Thank you for your patience on this. Please encourage the school district to remain engaged. EPA is working hard to get all of our internal stakeholders on board. We have an important call tomorrow and I will contact you later this week regarding next steps.

Hi Mary, checking in. I know this is a complex discussion and will take time. However, the school district is making regular contact to check on updates and I think they are trying to decide if they can remain engaged with this effort or need to switch their focus to another area. As you saw with our site scenarios, they are one of several stakeholders, and we don't have those

partnerships/relationships perfected yet, but we are very interested in keeping all of the parties at the table.

Is there any more that we can do/offer at this time with the hopes of having a joint meeting of the parties in the near future? Anything other than sending you annoying periodic emails to check in? ;) Thanks!

Rita,

Thanks for the update. We are coordinating internally and with DOJ. I should be able to get back to you late next week regarding a follow up visit.

Hi Mary, just touching base. We have been focused with the owner the last few weeks on some issues regarding trespassing onto their site (which I think we shared with you). There are some solutions moving into place on those matters. I have had a general conversation with the owner's representative on possible ways to move forward. I believe that there would be a willingness to meet when the time is appropriate.

We've also continued to share the site scenarios with our stakeholders, and will be presenting them to two of our key elected officials next week. So, all good things it would appear. If there is an ability to forecast what may work on your end for a follow up visit, please let me know and we will do all we can to help. If there is a need to discuss, feel free to give me a call. Thanks!

Subject: Dico property

Hi Rita,

I seem to recall that Sinnwell's had a contractor prepare some preliminary feasibility study work to evaluate steps needed to redevelop the Dico property. As part of that evaluation, do you know whether any cost estimates were developed for demolition of the remaining buildings? I would also be interested in any cost estimates prepared for modification of the groundwater pump and treat system. Please let me know if you are aware of any such estimates. Thanks!
